April Gardening Calendar

1. Remove all spent summer **annuals** in April and plant winter and spring-flowering annuals like Poppies, Pansies, Petunias, Primulas, Cineraria & Violas.
2. Plant winter and spring-flowering **bulbs** as soon as they become available. Feed with flower **bulb food** immediately after planting and at monthly intervals throughout the growing season. Water deeply every 4 days.
3. This is an ideal time to plant new **rose bushes, shrubs and trees** as their roots will be well established and they will burst forth with new foliage in spring.
4. **New hedges** should also ideally be planned and planted now. '**Edible**' hedges like Bay Laurel, Rosemary, Num-num, Quinces and Pomegranates are very trendy.
5. Plant **winter vegetable and herbs seedlings** out into prepared beds when they are strong enough. Plant with **bone meal** or **Bio Rock** and feed with **seedling food** to give them a good start.
6. This is a good month to plant **deciduous fruit trees** like peaches, plums, nectarines and apricots. If space is a problem, why not try your hand at the art of espalier?
7. Now is a great time to create your own **indoor haven** with the wide range of indoor plants and ferns that Lifestyle has on offer. Bring **colour indoors** and onto the **patio** with Cyclamens, Calendiva or Chrysanthemums available in striking colours.

GARDENING INSIDE AND OUT

The Lifestyle Garden Design Show 2024 raises the creative bar and covers **five outdoor garden spaces** offering something for everyone, from suburban rustic ecological, through domestic comfort-zone lifestyle living and playful succulent delights to a calming and secluded water and wetland haven.

This year's show also introduces an **all-time first** - an **indoor and patio area**, featuring five rooms each with its own distinctive character and showcasing exciting new plants and products.

In another unprecedented gesture, Lifestyle has decided to leave the heart of the gardens standing, where the essential ethos will be one of permanence and more enduring longevity.

Add the Wow Factor to your Garden Space

Date: Sat 6 April
Time: 10h30
Venue: Lifestyle Lecture Hall

What is the elusive **WOW-factor**? Come along and let **Michael Rickhoff** share with you all he knows of this Funky Fun Factor that brings life, spirit and impact to the garden space.

Lasagne Planting

A creative way to plant your bulbs to create a display of flowers that lasts for months

Hadeco Bulb Food

• 500g • Specially formulated for strong roots & abundant foliage & flowers

NOW R64.99
SAVE R30 6002037777010

Order is important - plant bulbs that will flower first in the top layer

Select a suitable pot, at least 15cm deep depending on how many layers you want to plan. Terracotta is great for this

Top layer: Muscari, Freesia, Leucojum or Ipheon

Bottom layer: Tulips, Daffodils or Hyacinths

FEED MONTHLY WITH HADECO BULB FOOD

Potting soil should be placed between each layer. Ensure bulbs are placed the right way up

Place a layer of pebbles or terracotta chips at the bottom of the pot, followed by 5cm of potting soil
