 • 15cm pot  
 • Long lasting flower spikes  
**NOW R109.99** ea  
**SAVE R40** 84973

## APRIL GARDENING CALENDAR

April, with its rich autumn colours and refreshingly cooler days has arrived, packed with lovely, leisurely long weekends and holidays...so much more time to go gardening!

- Time to plant winter and spring-flowering annuals like poppies, pansies, Petunias, Primulas, Cineraria, Calendulas and Violas. Choose from the wonderful range available now to add a pop of colour to your beds, pots and hanging baskets.
- This is an ideal time to plant new rose bushes, shrubs and trees as their roots will be well established and they will burst forth with new foliage in spring.
- New hedges should also ideally be planted now. Edible hedges like Bay Laurel, Rosemary, Num-num, Quinces and Pomegranates are very popular and trendy.
- Collect all the fallen autumn leaves and use as mulch or add them to the compost heap. Alternatively, collect leaves in black plastic bags and leave them

to decompose into wonderful leaf mold. Avoid using diseased leaves though.

- Plant winter vegetable and herb seedlings out into prepared beds when they are strong enough – as a rule of thumb when they have four true leaves. Feed them with organic seedling food to give them a good start. Mulch well and keep moist.
- This is a good month to plant deciduous fruit trees like peaches, plums, nectarines and apricots. If space is a problem, why not try your hand at the art of espalier?
- Now is a great time to create your own indoor haven with the lush foliage and textures of the wide range of indoor plants and ferns that Lifestyle has on offer. Bring colour indoors and onto the patio with the striking hues of Phalaenopsis orchids, Cyclamens or Chrysanthemums.
